Smart Campus Mobile App

What You Will Do

You will create a **mobile application** that helps improve **school or campus life**.

Your app should solve a **real problem** that students or teachers experience.

Your Goal

By the end of this project, you should be able to:

- Build a working mobile app
- Design a clean and user-friendly interface
- Add useful features
- Present your app confidently

Your Task

Create a **Smart Campus App** with at least **3 features**.

Choose Your App Features

Basic Features (Choose at least 2)

- 📅 Class Schedule
- 📝 Notes / To-Do List
- 📢 Announcements
- 📍 Campus Map

Advanced Features (Choose at least 1)

- 🔐 Login System
- ☁️ Online Database
- 🔔 Notifications
- 📷 Camera Feature
- 🌐 Internet Data (API)

Tools You Can Use

You may use:

- Android Studio

- Flutter
- React Native

What You Need to Submit

1. Your Mobile App

- Must be working
- Can run on phone or emulator

2. Documentation (Short)

Write 1–2 pages:

- App Title
- Purpose of the app
- Features
- Screenshots

Presentation (5–10 minutes demo video)

Explain:

- What problem your app solves
- How your app works
- Show a demo

Step-by-Step Guide

◇ Step 1: Plan

- Think of a problem in school
- Draw your app design (sketch)

◇ Step 2: Design

- Create your app layout
- Add buttons, menus, and colors

Step 3: Develop

- Make your app work
- Add features like:
    - Navigation
    - Data saving

Step 4: Test

- Check if your app works
- Fix errors

Step 5: Present

- Show your app to the class
- Explain clearly

Creative Task (Required)

Create a **physical model of your app** 📦

Use:

- Cartolina
- Cardboard
- Printed screenshots

Make it look like a **real phone with your app screens**

Grading Criteria

Criteria	Points
App Functionality	30
Design (UI)	20
Features	20
Creativity	10
Documentation	10
Presentation	10
TOTAL	**100**
